

EVAN BARTON

FULL-STACK SOFTWARE ENGINEER

Summary

I am a Lambda School graduate and APU student skilled in full-stack development. I have developed applications using both the PERN and MERN stack, and I am dedicated to learning new things. I am currently seeking a junior developer role with a company in which I can use my skills to develop superb applications.

Projects

Family Promise

React.js | Redux | SCSS

- Helped build a shelter management system for Family Promise of Spokane, a homeless shelter in Spokane, WA.
- Collaborated with a team of 2 back-end developers, 2 front-end developers, and 4 data scientists over the course of a month to implement additional features on an existing codebase.
- Responsible for building the project's executive director dashboard as well as the integration of Facebook and Google login.

Music-Connect

MongoDB | Express.js | React.js | Node.js

- Built a small social media site for musicians.
- Utilized the MERN stack.

Budget Tool

MongoDB | Express.js | React.js | Node.js

- Built a budget tool that allows users to create a budget based on the income and expenses they enter.
- Utilized the MERN stack.

Employment

Fort Mill School District

Bus Driver

Fort Mill, SC
Aug. 2021 to Current

Lambda School

Student Mentor

Remote
Sept. 2020 to Mar. 2021

- Work with multiple students concurrently.
- Address any issues they have with understanding the curriculum.
- Provide guidance and instruction related to their code.
